

AUDIO VISUAL

Solution Highlights 2017

BOARDROOM

Boardroom is the flagship meeting room, a richly appointed space to demonstrate the corporate culture and leadership. Aesthetically integrated with the decorative design, numerous Fortune 500 companies and listed companies have appointed UAT to deploy audio visual facilities in their boardrooms.

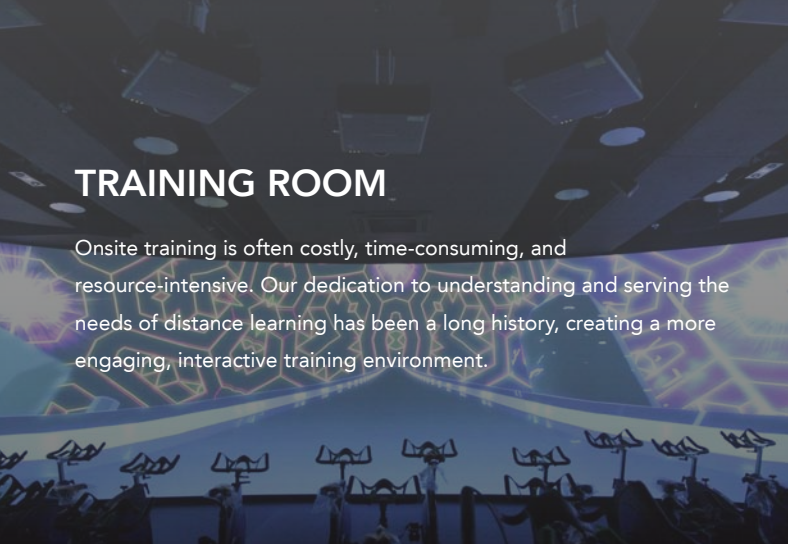

CONFERENCE ROOM

Conference rooms have varying applications, from internal uses such as worldwide conferences, board meetings, and employee trainings, to external uses such as sales meetings, room rental, and social gatherings. UAT possesses vast experience in integrated audio visual solution to accommodate different needs and occasions.

TRAINING ROOM

Onsite training is often costly, time-consuming, and resource-intensive. Our dedication to understanding and serving the needs of distance learning has been a long history, creating a more engaging, interactive training environment.

COMBINED ROOM

Flexibility and multi-functionality are essential to combined rooms in various shapes and sizes. The complexity of room combining is directly proportional to the number and connectivity of facilities. UAT is experienced in handling combined-divisible rooms using a centrally sourced, with comprehensive, high-fidelity solution.

OUTDOOR

Outdoor displays are widely customized for large screen applications in corporate communication, brand building, and target advertising through high-impact outdoor environments. UAT professionally installs a broad range of outdoor display solutions with excellence in visual, flexibility, and reliability.

THEATRE HALL

Theatre hall is the centerpiece of institutions providing a venue for lectures, speeches, ceremonies, and conferences. Theatre hall augmented with multimedia learning facilities require flawless system design, signal routing and processing to meet the day-to-day needs of mission critical applications with consistent reliability and robustness.

Many universities and tertiary institutions are using UAT as their audio visual contractor to deploy sophisticated multimedia education solution for theatres halls, auditoriums, and classrooms.

RECEPTION

Integrate audio visual technology with interior decoration at the receptions, entrances, and lobbies where visitors and employees meet and congregate for the important first impression. Once getting into the reception, the visitors will immediately be drawn to the impactful visuals.

SECURITY

We offer the world's most reliable D-Fence Intrusion Detection Security System from Israel, a country which demands the highest standard of security. This 'close to zero-false alarm' intrusion detection security system has been widely deployed for the protection of villas, houses, buildings as well as critical infrastructures around the globe – with noticeable references including the Israel and South Korea International Airports.
