

Intrusion Protection Security

The world most reliable D-Fence Intrusion Protection system has been widely deployed by private villas and houses, buildings and banks, airports and prisons and more, protecting people, assets, and properties with:

- Close to zero false alarm
- Blend into any design and environment
- An Israel security technology

Peace of mind – essence of reliable, customized building and room security design

False alarm, one of the critical challenges of traditional security systems, brings inconvenience and annoyance to lives. High voltage security systems, motion and infrared sensors raise the concern of health and false alarm.

Our Intrusion Protection Security solution integrates D-Fence (Intrusion Detection); CCTV (Surveillance); Security Control Room and/or Smart Phone (Alarm and Monitoring); Operational Plan (Response) to guard and protect your personal, property, and asset safety.
