IMAGO AIOS PRIME

IMAGO Flash

IMAGO Flash is IMAGO's proprietary video conference application built with rich capabilities and usability that promote consistent performance and user experience across any device and platform. IMAGO Flash is a fully secured, instant collaboration tool for effective virtual/hybrid classrooms. It offers a seamless experience for setting up or joining a video call right at your fingertips, anytime, anywhere, all within a single application.

Why IMAGO Flash?

- Instant Virtual Classroom - Join or host a virtual/ hybrid classroom in seconds.
- Supports any web browser on any device - No additional application or plugin is required for the host or participants.
- Scalability and higher video devices quality for education collaboration with hybrid private cloud.
- Seamless YouTube video sharing.
- Comes with an interactive polling feature & break-out rooms for education purposes.

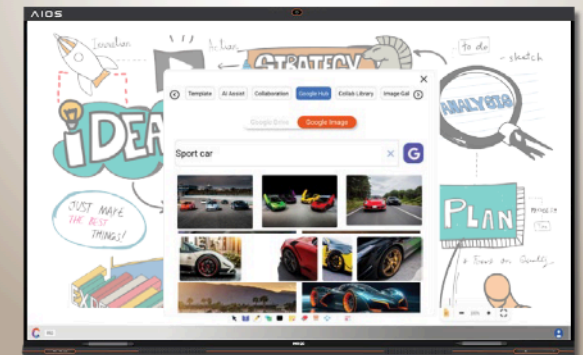

IMAGO Smart Present

IMAGO Smart Present is built to scale, it provides educators with the tools they need to have a seamless experience of a traditional physical classroom, moderate how students engage either in 1:1 mode or group collaboration, educators can leverage screen sharing control to promote collaboration and implement effective learning methodologies through individual or group assistance.

IMAGO Smart Present Classroom Management allow educators to focus on teaching, streamline the learning experience and keep their finger on the classroom pulse. IMAGO Smart Present elevate the traditional classroom experience to the innovative pedagogies of the future.

IMAGO Smart Present supports collaboration from any device, making your interaction with any IMAGO AIOS Smart Boards seamless.

- A Classroom Management & collaboration tool for interactive & fun learning.
- Share your idea effortlessly with real-time screen mirroring, up to 9 devices.
- Comes with moderator control with Reverse Broadcast up to 100 devices or more.
- Sharing is made even easier with high compatibility with multiple OS: Android, iOS, Windows, Mac & Chrome.

IMAGO Collab

A virtual whiteboard for live collaborations with a feature-rich library.

IMAGO Collab is a lightweight virtual whiteboard that enables distributed teams to work together effectively and seamlessly.

Compatible with any device and browsers

IMAGO Collab works on any device, from laptops to desktops, tablets, and mobile devices. It is also optimized for all browsers from Chrome to Safari and Edge.

Google Services Integration

Streamline your workflow and enhance productivity by accessing essential Google Services directly within Collab. With tools like Google Drive for file management, Google Meet for video conferencing, Google Search for quick information retrieval, Google Classroom for education, and Gmail for invites and communication, you can effortlessly collaborate and stay connected to achieve your goals efficiently.

Supercharge Brainstorming with AI

IMAGO Collab integrates AI-powered tools to enhance brainstorming sessions, including templates, a rich sketching library, and AI-generated images. Users can effortlessly import pre-made brainstorming templates, eliminating the need to start from scratch.

IMAGO Work

A Secured & Reliable File-Sharing & Collaboration Solutions.

IMAGO Work is a secured and reliable productivity platform for file sharing that keeps team members in sync by allowing users to collaborate in a real-time manner on documents and project files.

IMAGO Work is equipped with rich collaboration features that empower remote and distributed teams to teach and learn effectively despite the distance.

These features include file preview, file access control, file locking, online editing with remote collaboration, user management and single sign-on, cross-platform file syncing, data backup and recovery.

IMAGO Proctor

Control, Automate and Manage with Confidence.

An Easier Way to Manage and Maintain Your Classroom Investment.

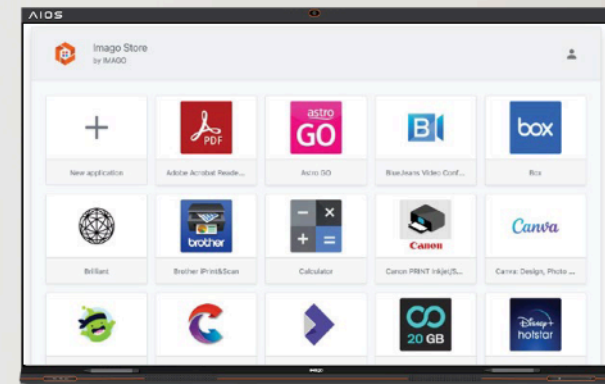

Deploying a fleet of IMAGO AIOS Smart Boards in your classroom is possibly one of the most significant investments in any educational institution. You will need an equally sophisticated yet easy-to-use solution to centrally manage and control your technology landscape at all times.

Take Control and Trouble Shoot Remotely.

A highly connected learning environment may present its own set of challenges where it also encourages unwanted "guests" or troublemakers who will try to tinker with device settings, causing devices to fail.

To enable teachers to focus and students to engage more effectively, IMAGO Proctor provides automated convenience by implementing patches, updates, and device configurations remotely, addressing these challenges seamlessly

- Unified Operations, wherever and whenever.
- Protect Your Devices, Users and Data.
- Software Management Made Easy

IMAGO Store
